

### GUI task – weight 5%

Task: write a GUI application where the user enters two numbers in two textboxes. Then, the application displays all the prime numbers between these two numbers in another textbox. It displays five numbers each line.

**Notice:** for marking, you may be asked to demonstrate, explain and apply simple modifications to your code in class. This may impact allocated mark.

Marking criteria:

1. Code indentation and comments: 5%
2. Simple design: 5%
3. An appropriate layout: 10%
4. Correct results for simple inputs: 50%
5. Correct results for boundaries scenarios: 30%.

Submission guidelines:

Zip the folder of the project and upload the zipped folder to the relevant link in moodle.
